

Fairbuds

Fairphone · Wireless Audio

Ayubaba Sustainability Record		Verified Sustainable
DESIGNATION	ASSESSMENT DATE	CATEGORY
Verified Sustainable	2026-07-28	Wireless Audio
Energy Star certification Records whether the product carries a valid Energy Star certification, or whether the certification does not apply to that product type. Engineer note: Not applicable, Energy Star does not currently certify wireless earbuds as a product category.		Advisory
Ecodesign Regulation Compliance Captures whether the product meets applicable Ecodesign Regulation requirements, is outside scope, or has not yet been verified. Engineer note: Fairphone states compliance with applicable EU Ecodesign requirements per manufacturer documentation; not yet independently verified by Ayubaba		Advisory
Materials Sourcing Documentation Stores the stated recycled content percentage and the supplier, manufacturer, or documentation source used to support the claim. Engineer note: Manufacturer states use of recycled plastics in casing per Fairphone's published sustainability materials; specific percentage and source documentation not yet obtained from manufacturer.		Advisory
Measured Energy Consumption Records measured energy consumption under the defined standard use cycle so the sustainability claim is supported by a test result. Engineer note: Not yet independently tested, no physical unit available for measurement.		Advisory
Packaging Sustainability Classifies the product packaging based on its stated or verified disposal route and material sustainability profile. Engineer note: Manufacturer states recyclable packaging per published product information; not yet physically inspected by Ayubaba		Advisory

Manufacturer Environmental Credentials

Advisory

Captures the manufacturer's environmental certification, scheme name, certificate number, reference link, or other evidence identifier.

Engineer note: Fairphone publishes B Corp certification and environmental impact reporting; certificate reference not yet logged.

EVS ID

AYU-EVS-WIR-5278

EVS Assessment Scores

TECHNICAL CONFIDENCE

42/100 — Poor

PRODUCT RISK

48/100 — Elevated

SUSTAINABILITY CONFIDENCE

0/100 — Poor

WHY THESE SCORES?

- Advisory raised on: Energy Star certification, Ecodesign Regulation Compliance, Materials Sourcing Documentation, Measured Energy Consumption, Packaging Sustainability, Manufacturer Environmental Credentials
- Measured evidence recorded on 0 of 6 completed checks
- No sustainability checks assessed
- All mandatory checks completed and passed

Record Authenticity

Version 1 · Immutable record — re-assessments issue a new version; previous versions remain permanently preserved.
